

ABOUT TAMMO VAN LEEUWEN

As Head of Product Management, Tammo van Leeuwen is responsible for overseeing all international product and business development efforts for loans solutions at Business Architects International. As a member of the executive committee of Business Architects, Tammo is accountable for the strategic development and the promotion of all Loans solutions across Europe.

He has been involved in the implementation of large loans service centres within two large tier-one banks. Based on these experiences, he has built up a strong knowledge base in this area and is a regular speaker at events addressing the practical implications of loans factories beyond national boundaries. Inaugurating the newly developed Collateral Management System, Tammo comprehends the challenges faced by banks needing support in registering, allocating and valuing their assets and collateral to meet the Basle II accord requirements.

Tammo is currently involved in the strategic development of the Business Architects concept to allow loan service providers to integrate the funding and servicing process. This maximises the value of portfolios and creates a transparent operational process based on an adaptable European loans system.

Joining the company in 1999, Tammo's initial task was to assist Business Architects with their successful expansion into the Dutch market. Prior to Business Architects, Tammo worked in management, sales and marketing positions with IT companies focused on the financial markets and a large Dutch insurer where he specialised in the sales and marketing of mortgages.

He has started his education at the officer's academy of the Royal Dutch Air force. After graduating, he remained in service for four years. He has a number of qualifications from the Dutch Institute for Banking and Insurance and holds a degree in marketing from The Chartered Institute of Marketing (CIM), one of the world's largest and most prestigious marketing associations.

Tammo lives in Bergen with his wife, two children and his two Italian Spinoni dogs.
